## **Discussions Relative to Performance Assessment for the Savannah River Site F Area Tank Farm Available to Public**

A series of discussions between representatives of the Department of Energy (DOE), Nuclear Regulatory Commission (NRC), South Carolina Department of Health and Environmental Control (SCDHEC), and the Environmental Protection Agency (EPA) have been conducted to support DOE's preparation of a new performance assessment for the Savannah River Site F Area Tank Farm. A performance assessment is prepared to evaluate potential impacts to members of the public and inadvertent intruders after closure of the F Area Tank Farm. These discussions have included the underlying assumptions, input parameters, and modeling approaches to be taken in developing this assessment. These technical discussions are intended to facilitate preparation of a final performance assessment. Once completed, the F Area Tank Farm Performance Assessment document will undergo review by the NRC, SCDHEC, and EPA. DOE has prepared a summary of each of the meetings. These meeting minutes can be found at the website <http://www.em.doe.gov/Pages/3116Summaries.asp> under the heading, *Meeting Summaries for Development of the Savannah River Site F Area Tank Farm Performance Assessment*.
